This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Applicant must comply with the requirements of the sequence rules (37 CFR 1.821 - 1.825) before the application can be examined under 35 U.S.C. §§ 131 and 132.

See, for example, the sequences on page 70.

Applicant is given ONE MONTH from the mailing date of this communication within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). A restriction is imposed, as set forth below. First, however, the following subgenera are defined:

G1: R^1 is limited to COR^5 , and R^5 is limited to $N(R^9)R^{(10)}$

G2: R^1 can be whatever the claims permit, provided that G1 is excluded.

G3: X is limited to $C=O$ or $C=S$

G4: X is limited to $C[(R)(R')]_p$

Restriction to one of the following inventions is required under 35 U.S.C. §121:

1. Claims 1, 9-17, 25-38, limited to G1 and G3
2. Claims 1, 9, 10, 12-17, 25, 26, 28-38, limited to G1 and G4
3. Claims 1-38, limited to G2 and G3
4. Claims 1-10, 12-26, 28-38, limited to G2 and G4
5. Claims 39-40, drawn to a method of using the Group 1 compounds.
6. Claims 39-40, drawn to a method of using the Group 2 compounds.
7. Claims 39-40, drawn to a method of using the Group 3 compounds.
8. Claims 39-40, drawn to a method of using the Group 4 compounds.
9. Claim 42, drawn to a method of making a composition using the Group 1 compounds.
10. Claim 42, drawn to a method of making a composition using the Group 2 compounds.
11. Claim 42, drawn to a method of making a composition using the Group 3 compounds.
12. Claim 42, drawn to a method of making a composition using the Group 4 compounds.

Claim 41 is not grouped. In the event that this claim is amended to conform with a proper statutory class of invention in accordance with U.S. practice, this claim will be grouped appropriately. Claims 43-47 are also not grouped. In the event that one of

Groups 1-4 is elected, claims 43-47 will be joined with that Group.

Applicant is advised that for the response to this requirement to be complete, an election of the invention to be examined must be indicated, even if the requirement is traversed (37 C.F.R. 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

.

In addition to the foregoing, applicants are required under 35 U.S.C. §121 to elect a specie for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. A "specie" is a specific compound, with all substituent variables accounted for.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. §103 of the other invention.
